I struggle to have it pull exactly what I am looking for. Learning is too broad. eLearning too narrow...

11:11:53 From Chris Karam To Everyone:

I use OneNote when I'm collecting information for a specific assignment/project I use Evernote to capture content as I'm finding it online; I use file folders when work is complete (deliverables) that is shared and could be re-used in the future. This means I pretend I have a system. I'm not consistent enough and then there are duplicates/cross-over items.
